## Aim:

Write a program to print the [multiplication table] for a given number with the number of rows in the

Exp. Name: Write a Program to print Multiplication Table for a given number

For example, for a number 2 with 3 rows, the output should be:

```
2 * 1 = 2
2 * 2 = 4
2 * 3 = 6
```

At the time of execution, the program should print the following messages one by one on the console as:

```
Enter an integer number :
Enter number of rows :
```

For example, if the user gives the input as:

```
Enter an integer number : 5
Enter number of rows : 4
```

then the program should **print** the result as:

```
5 * 1 = 5
5 * 2 = 10
5 * 3 = 15
5 * 4 = 20
```

**Note:** Do use the **printf()** function with a **newline** character  $( \setminus n )$ .

## **Source Code:**

## Program411.c

```
#include<stdio.h>
void main()
   int n,r,i;
   printf("Enter an integer number : ");
   scanf("%d",&n);
   printf("Enter number of rows : ");
   scanf("%d",&r);
   for(i=1;i<=r;i++)
      printf("%d * %d = %d\n",n,i,n*i);
   }
}
```
