Date:2023-01-10

Aim:

Write a program to implement the string manipulation operations by using string library functions.

At the time of execution, the program should print the message on the console as:

```
Enter two strings :
```

For example, if the user gives the input as:

using library functions

```
Enter two strings : Ram Laxman
```

then the program should print the result as:

```
The length of Ram : 3
The copied string of Ram : Ram
Ram is greater than Laxman
The concatenated string : RamLaxman
```

Note: Do use the **printf()** function with a **newline** character $(\n$) at the end.

Source Code:

Program612.c

```
#include<stdio.h>
#include<string.h>
void main()
   char str1[20],str2[20],copy[20];
   int i;
   printf("Enter two strings : ");
   scanf("%s", str1);
   scanf("%s", str2);
   i=strlen(str1);
   printf("The length of %s : %d\n",str1,i);
   strcpy(copy,str1);
   printf("The copied string of %s : %s\n",str1,copy);
   i=strcmp(str1,str2);
   if(i==0)
   {
      printf("Both strings are equal\n");
   }
   else if(i<0)
      printf("%s is less than %s\n",str1,str2);
   }
   else
      printf("%s is greater than %s\n",str1,str2);
   strcat(str1,str2);
   printf("The concatenated string : %s\n",str1);
```

Execution Results - All test cases have succeeded!

Test Case - 1

User Output

Enter two strings : Ram Laxman

The length of Ram : 3

The copied string of Ram : Ram

Ram is greater than Laxman

The concatenated string : RamLaxman

Test Case - 2

User Output

Enter two strings : Teacher Student

The length of Teacher : 7

The copied string of Teacher : Teacher

Teacher is greater than Student

The concatenated string : TeacherStudent

Test Case - 3

User Output

Enter two strings : Languages Programming

The length of Languages : 9

The copied string of Languages : Languages

Languages is less than Programming

The concatenated string : LanguagesProgramming

Test Case - 4

User Output

Enter two strings : Ganga Ganga

The length of Ganga : 5

The copied string of Ganga : Ganga

Both strings are equal

The concatenated string : GangaGanga
